

- Disposable
- Single Step diamond impregnated composite polisher
- Leaves a brilliant shine on ALL composites
- Economical

Meisinger's newest innovation, **Elevation**[®] disposable composite polishers, were designed to achieve a high shine luster on hybrid composites, microfilled composite restoratives, and high density restorative material in one single step. These new diamond impregnated, single-use polishers can bring virtually any restorative material to a shine resembling that of natural tooth enamel. When used in conjunction with our new Twist finishers, you can create a natural looking restoration that will have your patients leaving extremely satisfied.
